STEPHEN GORMLEY
DIRECTOR OF OPERATIONS

Integrated Pest Management Plan 2022

Narragansett High School

The Narragansett Schools follow a pest management plan whereas control is achieved using progressive steps including:

- Selection of the least hazardous method and/or materials that will provide effective for control of targeted pests.
- Non-chemical prevention of pests using methods such as sanitation, exclusion, and cultural methods.
- Application of pesticides only, “as-needed” to correct verified problems.
- Precision targeting of applied pesticides to areas not contacted or accessible to the children, faculty and staff.

Notifications will normally be made to registered staff and parents/guardians at any building **before** any pesticide application. Staff, parents/guardians are reminded that they can request “pre-notification” of any pesticide application. Written “pre-notification” request should be submitted to the principal at each building. These requests must be resubmitted at the beginning of each school year, or when you, or in the case of a parent/guardian your child enters the school building. The request must include your name, complete address including telephone and e-mail when possible.

Emergency pesticide applications may occur, when a sudden need to mitigate or eliminate a pest which threatens the health & safety of a student or staff member. In the event that an, “emergency” application of a pesticide occurs, notifications will be forwarded no later than the day of the application.

All notifications will include:

- The affected building and the applications location.
- The common trade name of the pesticide.
- The EPA registration number
- The targeted pest.
- The date of the application
- A School Administrator’s contact information to call if you have any further questions.

Since our last, “annual” notification:

- No pesticide application occurred at Narragansett High School.
